CLEAN RIVER REWARDS is Portland’s stormwater discount program. Stormwater that isn’t managed properly can pollute rivers, streams and groundwater. When you manage stormwater runoff on your property to keep it from flowing to city stormwater management facilities, you help reduce stormwater volume and protect water quality. As a result, you can qualify for up to a 100% discount on your on-site stormwater management charge.

REQUIREMENTS

- The ratepayer must register to receive a discount, and your utility account must remain active.
- For duplexes and single-family residences, the discount is based on managing runoff from roofs. For all other properties, the discount is based on managing stormwater runoff from roofs and paved areas.
- Your stormwater management cannot threaten or damage property or the environment.
- You must properly maintain your stormwater management facilities.
